#### U.S. COAST GUARD - AIDMIX - RESEARCH & DEVELOPMENT

If you are a licensed mariner who has operated a commercial vessel within the last two years, a commercial fisherman, or a recreational boater, we invite you to participate in the aids to navigation web based questionnaire. On average, the questionnaire takes 30 minutes to complete. The process is designed to help Coast Guard program managers determine the types of visual, auditory and electronic navigation aids that are necessary today and in the future. User input and feedback is a key component for this project. Background information about this project can be found by using the following web address: [www.rdc.uscg.mil/rdcpages/research8599.html](http://www.rdc.uscg.mil/rdcpages/research8599.html). The questionnaire web site can be accessed using the following web address: [http://atonstudy.msi-ct.com/welcome.htm](http://atonstudy.msi.ct.com/welcome.htm). Thank you for your participation. If you have any questions, please contact Kathleen Shea at: [kshea@rdc.uscg.mil](mailto:kshea@rdc.uscg.mil) or at (860) 441-2600 and faxes to (860) 441-2792.

### IV CHART CORRECTIONS

This section contains corrections to federal and private maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. The mariner must decide which Chart(s) to correct. The following example explains the individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91 <sup>st</sup> Ed.	04/19/97	LAST LNM 26/97	NAD 83	(CG1)	27/97

Add	National Dock Channel Buoy 3, green can					
Corrective Action	Object of corrective Action					Position (Degrees, minutes, seconds and tenths)

The letter (M) immediately following the chart number indicates that the correction should be applied to the Metric side of the chart only. (Temp) Indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM).
